PROFILE

Bilingual frontend developer with expertise in React, recognized for timely project delivery, effective problem-solving, and writing efficient code. Strong skills in code scalability, integration, and ensuring high-quality standards. Holds a Meta Frontend Developer Specialization and graduated from Greenfox Academy's Full-Stack Development Boot camp. Member of Mensa community.

EMPLOYMENT HISTORY

Apr 2024 — Jul 2024 **Javascript developer, Emplifi** Prague

- Develop and Maintain Web Applications: Created and optimized front-end features for Emplifi's customer engagement platforms using JavaScript and React, enhancing user experience across social media and digital channels.
- Collaborate with Teams: Worked with UX/UI designers, backend developers, and product managers to integrate new features and address client feedback, improving application functionality and performance.

Dec 2022 — Mar 2024 **Frontend developer, NN Group** Prague

- Lead frontend development of React applications for an insurance company, focusing on personalized user experiences and maintaining robust functionality using React, TypeScript, MUI, Redux and Git.
- Collaborate with design and backend teams to enhance application quality, ensure seamless API communication, and train colleagues transitioning to full-stack development, while consistently delivering clean, efficient code in a fast-paced environment.
